Personal Projects – github.com/BrandonRoehl
- **Day & Night** (*AppStore*) – https://apps.apple.com/us/app/day-night/id1350609762?mt=12
  macOS 10.13 High Sierra had no dynamic wallpapers and I wanted them and custom so I
  made this app. It has been updated to work with automator on macOS and newer versions
  where now it allows custom series of images in Apple's Core Data
- **Theseus** (*BrandonRoehl/theseus*) – A rails app that uses vast meta models to produce and
  cache configuration data with REST apis for ease of use
- **TruBool** (*BrandonRoehl/TruBool*) - A web app for teaching boolean gates and logic where
  you can draw and evaluate circuits

Contributing Projects
- **Go MySQL Dump** (*jamf/go-mysqldump*) – Go native MySQL dump that matches the
  existing utility
- **A.L.E.** (*dense-analysis/ale*) – Added Ruby linters and handlers
- **Foundation Rails** (*zurb/foundation-rails*) – Fix for taking distilled classes in the update to
  Rails 5
